

TOKIO//JOE

SAKE

There are so many different types of sake. At Tokio Joe, we'd like to focus on some major types and classifications.

DAIGINJO is super premium sake and is regarded by many as the pinnacle of the brewer's art. Daiginjo sakes are served chilled to bring out their nice light, yet complex flavors and aromas.

JUNMAI is the Japanese word meaning "pure rice" There are no other additives, such as sugar or alcohol.

GINJO is a premium sake. The result is often a light, fruity and complex flavor that is usually quite fragrant.
